Jobsite Safety Award 2015

Navigating the Road to Safety ...

This year our Sales & Marketing Contractor Jobsite Safety Award goes to SF DeMelis. The aim of the award is to spotlight the hard work of organizations that engage safety into how they operate.

SF DeMelis is definitely a willing service provider that jumps in and tackles emerging challenges, with over ten thousand routine maintenance calls.

SF DeMelis provides installation and modification services to Retail and Wholesale service stations nationally for our Sales & Marketing, Asset Management division of Suncor. In 2015, SF DeMelis completed: roofing & paving, yard & building, fast food and car wash routine maintenance work projects.

Trevor Campbell Manger Network Maintenance, Suncor mentioned "DeMelis has supported Suncor with a very strong performance on safety over the last three

years. They've done so while completing more service calls than any other maintenance service provider across a wide spectrum of work and sub-trades. I'm pleased with the work done to make safety their #1 priority."

DeMelis continues to be a strong performer in our 3rd party safety audit program and internal Suncor Safety Inspections. They prove operational excellence through leadership in the Petroleum Orientated Safety Program (POST), an external industry committee. Thousands of work-hours in 2015 with no recordable injuries; no recordable injuries in the past three years; fantastic results with audits and proactive monthly safety newsletter.

Fred DeMelis Director, commented, "our award is proudly mounted as you enter our office. It is a constant symbol that safety is an investment for the future. It shows our hard work and consistent effort with training, equipment knowledge, compliance with legislative updates."

This award has been around for a few years now and it is worth mentioning this is a holistic effort by all our Sales & Marketings contractors for their outstanding work. Most recently 2014 SM Construction and in 2013 S-A-S Petroleum have received this award. Contractors that receive this award have demonstrated focused results on:

- Recordable Injuries (medical aid, restricted work, lost-time) year over year,
- Positive mindset on 3rd party safety audits with continuous improvement actions, and
- Display an operational excellence mindset in leading a safety culture that ensures collaborative efforts, strategic response to issues, proactive reporting tools and training programs.

We're constantly looking for innovative behaviours that are driving the road to safety. It's always a pleasure recognizing our contractors for safety leadership. Please join us in congratulating SF DeMelis for their excellent safety performance in 2015, this year's recipient of the Job Site Safety Award.

Sincerely,
Sales & Marketing, Downstream Division
